

SETBACKS WILL CREATE COSTLY ENERGY SHUTDOWN IN LOS ANGELES COUNTY

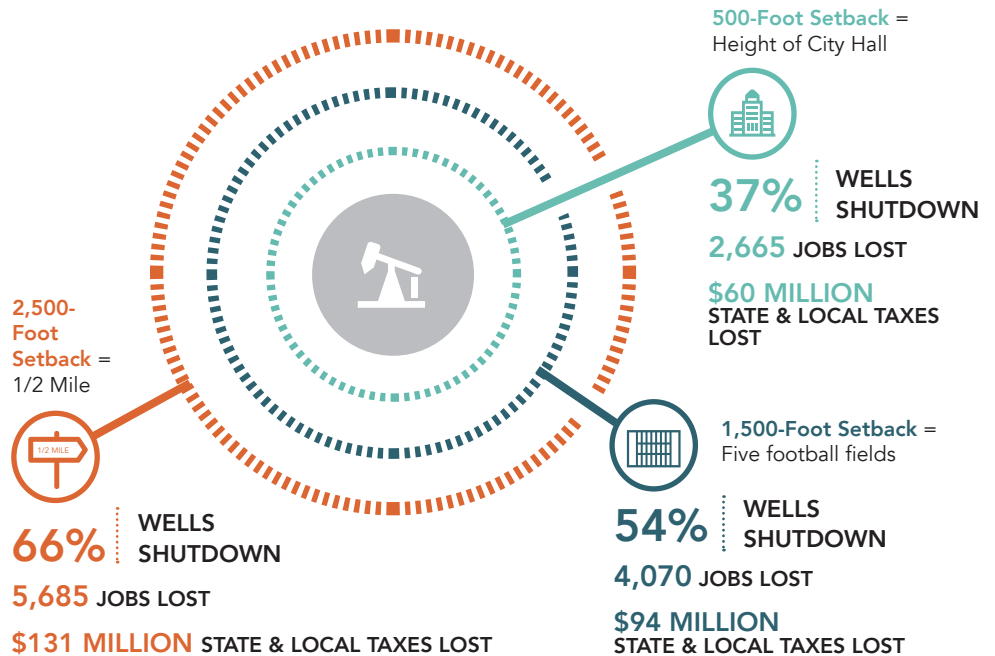

Eliminates Jobs and Damages Local Economy

Setback requirements on oil and gas production in Los Angeles County will make it no longer economically feasible to continue most production in the County.

Setback scenarios result in an energy shutdown in Los Angeles County¹

WHAT IS A SETBACK?

A setback is a required separation between a building or a structure. In dense urban areas like Los Angeles, setback requirements create impossible challenges for decades old operations (some 100 years) because of increased urban in-fill. As a result of this high density, there is no place for oil and gas operators to create increased separations.

Oil and gas production has been a vital part of the Los Angeles County economy for more than 100 years, providing safe and reliable oil production, well-paying jobs and an affordable energy supply for consumers and businesses.

WHAT DOES A COSTLY ENERGY SHUTDOWN MEAN FOR LOS ANGELES COUNTY?

JOBS

THOUSANDS OF WELL PAYING JOBS WITH GOOD BENEFITS FOR WORKING FAMILIES

REVENUE

MILLIONS IN TAX REVENUES THAT SUPPORT VITAL COMMUNITY SERVICES LIKE POLICE AND FIRE

AFFORDABLE ENERGY

AFFORDABLE AND RELIABLE ENERGY SUPPLY FOR LOW INCOME FAMILIES

CALIFORNIANS FOR ENERGY INDEPENDENCE

Californians for Energy Independence is a coalition that supports state and local policies that allow for continued domestic energy production and opposes those policies – such as oil taxes and energy bans – that would hinder production and increase reliance on foreign oil.
